# T-SHIRTS!

We only carry brands we believe to be reliable. **First**, decide between **PFD (Prepared for Dyeing), RTD (Ready to Dye)** or **Regular.** PFD and RTD are sewn with Cotton thread, so white stitching doesn't show on the dyed garment. Gildan, the Hemp, and both Organic brands are true PFD - off-white, unbleached, so with tie-dye or batik, the background won't be bright white, but they take dye like champs for solid color dyeing. All the LAT Apparel shirts (and their other garments) are sewn with Cotton thread so they dye great, but they are also bleached & optically whitened (neon!), hence we call them RTD. The "Regular" - other big Brand Names) dye just fine, are bleached & whitened, but sewn with poly thread (doesn't dye), are cut normally & are compacted to reduce shrinkage. If you dye the entire shirt, as in garment dyeing & batik, buy the tees sewn with cotton thread. If you tie-dye & leave white in your design, stamp, marble, or do transfers, then poly white thread in the tees might be ok for your project. Decide on the weight (thickness) you want. Heavier weights are sturdier, lighter weights more "in style" right now. Combed ringspun is softest. Look at the info & prices & decide which works for you. Big plus: Though made overseas, Bella/Canvas, Fruit-of-the-Loom, LAT Apparel, Hanes, & Gildan are now all made at WRAP Certified factories! ****We have added colors (drop-shipped) of some name brands.**

## GILDAN

Gildan is a very popular shirt with tie dyers & screen printers - excellent quality at a great price.
True PFD (off white) tee is sewn with **Cotton thread.**

### DHARMA HEMP T-SHIRT

An honest hemp t-shirt! The real deal! NOT viscose rayon made from hemp. Made from real Hemp fiber yarn (slubby appearance), mixed with Cotton & enzyme washed for softness. 7.1 oz 55% Hemp / 45 % Organic Cotton Jersey. Sewn with cotton thread. Since it's NOT chemically altered, retains the properties that hemp is famous for: Odor control, anti-bacterial, lasts forever, doesn't wrinkle, hemp enthusiasts go on and on! Great for camping!

We scoured the globe, & finally, we found an honest Hemp t-shirt that wasn't priced sky high. It was so hard to find a true Hemp t-shirt (that wasn't actually Rayon) that we had to get someone to make them just for us. Sturdy, generously cut tee. Sewn with mercerized cotton thread for strength & perfect dyeing. The nice looking slubby fabric is cool in summer, warm in winter, & sustainable! You can put your best art efforts in on these, because they will not wear out!

## CERTIFIED ORGANIC!

### NATURAL COLOR COTTON PFD T-SHIRTS ORGANICALLY GROWN COTTON

*NO CHEMICALS USED*

There's this guy, Gary & his wife, down in Texas who grow cotton completely organically. They're certified organic by the Texas Dept of Agriculture. They also gin the cotton, spin the yarn, knit the cloth & sew the shirts!

***#OCT***

Washing is done with natural biodegradable soaps & softeners. No formaldehyde is used. We don't mean they do it all in their kitchen - they've created a textile industry around them. It's quite a thing to make a T-shirt from seed, sun & water - don't you think? Anyhow, the T-shirts are nice, 5.5 oz. Jersey, standard size to start, but shrink more than pre-shrunk brand-name shirts, sewn with cotton thread, double needle hems & neckline. These true PFD natural creamy color shirts take dyes very well. Because the cotton isn't bleached or whitened in any way, variation in the color, even within the same shirt, is perfectly normal. Support your (sort of) local organic farmer!

## SIZING IS NOT AN EXACT SCIENCE!

No two clothing manufacturers agree on proportions of each size. Some companies cut oversize to allow for shrinkage, some don't. We measure every product & provide those measurements (before shrinkage) on our website to help guide you in your size decisions. There are also no guarantees regarding shrinkage, but in general, unless stated, our blanks are NOT pre-shrunk. Rib knit shrinks more than Jersey & you usually get more shrinkage in length than in width. Sharp changes in temperature & lots of agitation cause more shrinkage. In the end, we have to leave it to you what size to buy. Check out our measurements on our website & allow for shrinkage, usually about 3-5% in width & 8-15% in length. Loose weaves shrink most. Rayon Crinkle Gauze shrinks about 5" in the length on the average garment.
